EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eckhard Kuesters on March 4, 2005.

The application has been amended as follows:

a) In claim 3 between lines 16 and 17, insert:

-- "wherein the backup operating means in said node units inserts a first predetermined signal at the exit to lower-tier terminals where said sub-traffic communication path is set and inserts a second predetermined signal, which is different from said first predetermined signal, at the exit to lower-tier terminals where no sub-traffic communication path is set." --

b) Cancel claim 2.

c) In claim 6 between lines 15 and 16, insert:

-- "wherein said step of inserting a predetermined signal comprises:

a step of checking the protection transmission lines corresponding to the service transmission lines where a failure has been detected in said failure detection step for any sub-traffic communication path; and

a step of inserting a predetermined signal that, when a sub-traffic communication path is detected in said failure detection step, inserts a first

predetermined signal at the exit of the sub-traffic communication path to lower-tier terminals, and when no sub-traffic communication path is detected in said failure detection step, inserts a second predetermined signal at the exit to lower-tier terminals substantially connected to said protection transmission lines." --

d) Cancel claim 5.

e) In claim 9 between lines 20 and 21, insert:

-- "wherein said control unit has:

a sub-traffic communication path detection means for checking the protection transmission lines corresponding to the service transmission lines where a failure has been detected in said failure detection step for any sub-traffic communication path; and

a predetermined signals insertion means for making the interface unit for lower-tier terminals that serves as the exit of the corresponding path to lower-tier terminals send a first predetermined signal to lower-tier terminals when a sub-traffic communication path is detected by said detection means, and for making the interface unit for lower-tier terminals that serves as the exit to lower-tier terminals substantially connected to said protection transmission lines send a second predetermined signal to lower-tier terminals when no sub-traffic communication path is detected." --

f) Cancel claim 8.
